Poultry Assn. Okays Merger By 57-5 Vote

By vote of 57 to five, the Lancaster Poultry Assn. approved the merger of the association and Lancaster Poultry Exchange. The vote was taken at the association's annual meeting Tuesday night at the Poultry Center

The members also approved a resolution authorizing the directors of the association to take such legal steps as are necessary to effect the merger. The Exchange had approved the merger at a meeting last week

Speaker at the meeting was Lee H Bull, deputy secretary of agriculture for the state He gave an outlook on the future of agriculture in the Commonwealth

Bull outlined five current programs that are of particular interest to the poultry industry. First is the hiring of added inspectors by the Bureau of Markets to enforce the Fresh Egg Laws

Second was the changes and modifications in the Fresh Egg Law that went into effect on Jan 16 Bull noted that the addition of the Fancy 60 and Fancy 80 grades had been made.

A third program underway is the establishment of a Pennsylvania certification program in which there would be state supervision of egg grading This would lead to greater promotion of Pennsylvania produced farm products

A fourth program underway is a promotional venture on the behalf of poultry being carried out

(Continued on Page Five)

THE U.S. WEATHER Bureau claims that groundhogs know less than they about the weather. But in parts of the County, especially around Quarryville, the groundhog is regarded as a never failing prophet. Some cousins of these three young animals will have a chance to prove their powers of prognostication on Sunday So in order not to take chances, let's hope for clouds and a mild early spring. (Photo by George Smith)

Somerset Co. State's 48th Soil District

State Secretary of Agriculture William L. Henning Thursday announced the official organization of Somerset County as the state's 48th soil conservation district.

In reporting on its formation Secretary Henning said Somerset County becomes the 18th new district in the last two and a half years and brings to 80 per cent the total of Pennsylvania farm land in soil conservation districts

Stock Producers Co-op Shows Drop In Membership, Volume in 1957

A decline in membership, sales, headage, and volume was reported to members of the Producers' Livestock Cooperative Saturday at the Farm Bureau. However the operations of the stock buying and seling co-op neted $2,081.61 for the year.

The net was up by some $4,700 from 1956, manager Noah H Huber noted.

Marketing specialist Wesley Kribel gave the cattlemen his views on the outlook for cattle and hog feeding for the coming months. He noted that in 1957 total slaughter was down by three per cent and that per capita meat consumption has also dropped.

He said that price discounts for heavy stock could be expected next spring because many feeders are taking advantage of cheap corn and milo to feed out animals to heavier weights than usual.

He also noted that 1957 saw one of the sharpest decreases in cow marketing in history. Part of this can be attributed to the drastic need for young stock and feeders as Western stockmen rebuild their herds and as more Midwest farmers turn to feeding cattle.

Also on the program was County Agent Max M Smith who discused some of the production problems facing cattlemen. One of these, he said, was that Eastern feeders are going to start to have to reply on Southern cattle for stockers due to the high prices commanded by Western stock.

This means, Smith said, that parasite control, both internal and external, will be a "must" on Pennsylvania fams because most Southern cattle will come on the farm infected to a greater or lesser degree

Another popular topic with Smith and the cattlemen was the increased use of roughages in the cattle feeding program. Various cattlemen noted that they were in competition with 80 cent corn in the West when they had to put out well over a dollar a bushel for grain to fatten their cattle.

A breakdown of the cooperative balance sheet shows that there are now 991 members. A total of 1.035 sales were made during the year which accounted for 3,445 head of feeders and 5,564 head of slaughter cattle. Total volume was $1,151,675.74. The net from the operation was $2,081.61.

AN ARC WELDER is one of the handiest pieces of machinery in the farm shop—and one of the most dangerous. Here John B. Hurst, R1 Narvon, demonstrates two safety practices that should always be followed: Always wear the mask, no matter how small the job; and, don't weld wearing clothing with open cuffs that may catch hot sparks. Another caution is to use a shield if another person is usually in the shop. (LF Photo)

Extension Assn. to Honor Newsmen At Annual Dinner in Lancaster

The communications industry—newspaper editors and radio and television farm directors—will be guests of honor at the annual dinner meeting of the Lancaster County Agricultural and Home Economics Extension Assn. on Feb 13

The dinner will begin at 6.30 p m. and will be held in the Social Rooms of the First Presbyterian Church, 136 East Orange St, Lancaster.

Speaker at the dinner will be Prof. William Smith, College of Home Economics, PSU. He will discuss family relations in modern times.

Five new members of the executive committee will be elected. Reports from extension personnel will be made.

The county is divided into five districts with two men and one woman representing each district. A third of the directors are elected for three year terms annually.

Presently serving on the board are A. Clyde Kreider, R1 Quarryville Mrs John Stoner, R1 Quarryville Ira Rutt, Peach Bottom; Harry F. Houser, R7 Lancaster; Mrs Mark S. Hess, R6 Lancaster.

Ralph Breneman, Washington Boro, B Snavely Garber, R2 Willow Street; Mrs Robert Hess, Strasburg, J Homer Graybill, R3 Manheim; Jacob E. Buckwalter, R3 Lititz; Mrs. J Nissley. R1 Mt. Joy, Mrs Allen Risser, R1 Bareville, W. Z. Esbenshade, 1631 Esbenshade Rd., Lancaster; J. Lloyd Rohrer, R7 Lancaster, and Melvin Rohrer, R3 Lititz.

Babcock's

Healthy Chicks Make Great Layers!

Here's How To Make Even More Money With Babcock Bessies —Just By Planning Ahead

Monroe C. Babcock

We feel Babcock Bessies are about the best money-maker you can get in a laying hen But you can make even more money on these birds by planning ahead, and taking advantage of our early order discount.

Here's the way it works:

For each full month you order your chicks in advance of the day they are to hatch, deduct 15¢ per 100 chicks or $1 50 per 1,000 chicks from our current prices. If you order as much as 12 months in advance, you will save $18 on 1,000 chicks. That's the same as getting 4% interest without paying any money. We also allow a liberal discount for cash in advance of the hatch date.

You'll like Babcock Bessies if you haven't tried them before because they'll produce 235-270 eggs per year per bird housed, and they'll stay in good production for 14-15 months. If you can plan now for your chick needs of coming months, you can add to your profits Your early order helps us plan better so we can provide you with chicks exactly when you want them.

Things Aren't So Bad Here

ACCORDING TO MOSCOW sources, a Soviet scientist has come up with a new cattle breeding formula for assuring that Communist Russia will achieve its goal of producing more meat and milk than capitalistic United States.

The substance of his theory amounts to the breeding of small bulls to large cows of high milk productivity to get small calves that won't endanger the mother at birth but will have the mother's high milk potential.

How's that for killing two birds with one stone? Where he's to get his large cows in succeeding generations by that method, he doesn't say. But, we suppose, they could always be imported from the United States, thus proving the infallibility of Soviet theories and the gullibility of Americans who'd even part with large, high-producing cows for enough Yankee dollars.

Another tale from Moscow on the farm front indicates that the spirit or practice of capitalism by Soviet farmers is not yet dead.

It seems that sugar beet production has been dropping for the last couple of years in the "Workers Paradise." Now comes the tale that the farmers have been converting the sugar beets into the Russian version of "moonshine" instead of sugar.

They were taken to task for this practice by none other than Khrushchev, who, peculiarly enough, has never been noted for his abstinance.

Old Sol Gets New Job

OLD SOL MAY be cast in the new role of herdsman, it appears A Purdue University ag engineer has developed a device by which energy from the sun is harnessed to operate an electric fence charger. Here's how it works.

Silicon solar cells, located in a frame atop a conventional fence charger, collect radiant energy for the sun and convert it directly to electrical energy. And it works just as well on cloudy days, too, because those solar cells also charge nickel-cadmium storage cells inside the fence charger. These operate the charger when Sol is hiding the clouds and at night.

It appears this would be just the ticket for those fields which can't be reached by the electric line and in other spots where batteries must be relied on.

Now Is The Time . . .

By MAX SMITH

County Agricultural Agent

Max Smith

TO PREVENT MASTITIS IN DAIRY HERD — The emphasis should be on the prevention of mastitis rather on the treatment. Using antibotic udder treatments too often may endanger the health of your cows; also, prevention is less expensive than treatment. Proper feeding and herd management are worthy of full-scale adoption; here lies the long-range answer to dairy herd mastitis problems.

TO GIVE SPECIAL CARE TO SHEEP FLOCK — Lambing time is at hand on many farms or in the near future The ewe flock should be given daily outside exercise. One common problem with the flock late in the winter is the "paralysis" condition just prior to lambing. Daily exercise, legume hay, and a laxative grain ration will reduce this problem. Individual lamb brooders will save many lambs in extremely cold weather.

TO PLAN HOME GROWN FEED SUPPLIES — Effort should be extended among all dairy and livestock producers to produce a maximum amount of grain and roughage on the farm. Before the planting season starts it is suggested that producers look into the future and plan their crops in order to keep feed purchases at a minimum. Too high feed costs have been the down-fall of many a farmer.

TO ADOPT MANAGED MILKING ROUTINE — Progressive dairymen will quickly realize what is involved in "managed milking". This practice should have the acceptance of many more herd owners. It is merely using an outlined routine of preparing and milking the cow each time a total time of seven minutes per cow. Full details in leaflet No 40 titled, "Managed Milking'.

This Week in Lancaster Farming

BY JACK REICHARD

75 Years Ago

"Easy to get and hard to hold" sang the poet of gold and there was never more truly words spoken in prose of poetry

The trouble comes from not knowing the actual value of money The individual who has been compelled to earn his own bread from youth knows the value of a dollar To most men fortunes come only by hard work, carried on through many years of unremitting effort.

But there is another class who, when fortune drops into their laps expected or unexpected, lose their heads and usually their money also A case falling in this class involved the Tilden boys, who made national front page news back in 1883

Their father began his career as a peddler of varnish He worked hard for many years By thrift and business sagacity he succeeded in accumulating two and a-half million dollars. In 1869 he died, leaving his great wealth to four teenage sons

During their frugal father's life the boys were kept down to a moderate allowance, perhaps much against their inclinations But at his death all this changed. As the acknowledged heirs to great wealth, the sons were not compelled to work. They believed that the money was intended to be enjoyed, and through the indulgence of guardians they planned a European trip, employing a traveling tutor at a salary of $5,000 with all expenses paid.

Within a period of 13 years this fortune, accumulated during the life time of the hard-working father, had entirely disappeared in the hands of his children.

Back in 1883 the crew of the life-saving station at Spring Lake along the East Coast, discovered in the undertow, near the station house, a huge fish, which they succeeded in killing. The fish measuring over nine feet and weighing 800 pounds, was sent to the Smithsonian Institution where Prof. Balard stated that fish represented a species never before seen in the United States or even in the Atlantic Ocean According to the professor, it belonged to a group of small sperm whales characterized by the absence of permanent teeth in the upper jaw, and was one of the greatest acquisitions to the institution.

50 Years Ago

Fifty years ago the State of Arizona apparently held a dislike for children, according to a New York City woman who had taken up residence with her family in southern California. The lady stated:

"Talk about children not being wanted in New York apartments. Why, Arizona is the worst place in that respect that I have ever visited. You can hardly find any one there who will rent you a house if you have children We tried various towns in the state but there was no abiding place open to us because of our little olive branches

"We should have liked to settle in Tuscon, but not a landlord would have us. Finally we had to give up and go to Southern California, where they are not so hard-hearted. Wouldn't you think that a new country like Arizona would be glad to have settlers with children, who would help to build up the region? But it doesn't seem to be so".

* * *

In Rue Belliard, France, the question of children, dogs and pianos in apartment houses was of utmost importance. Back in 1908 a company of house owners announced that all tenants must be fathers of families having three children at least.

PLANET MARS
"TEASED" ASTRONOMER

Professor E C Pickering, Harvard's leading astronomer and scientist, in 1908, startled the world of astronomy and astro physics by declaring that Mars "teases" him, and that he was "abandoning any further investigation of the much-mooted planet".

25 Years Ago

Cotton was one of the leaders in American export trade.

During the first eight months of 1932 the value of cotton exports was more than seven times that of wheat exports. It exceeded the value of the combined exports of all American machinery, automobiles and parts, cotton cloth, wheat flour and rubber manufacturers — whereas in 1931, the export value of these articles was more than double that of cotton

It looked as if the cotton growers were entering a new era. Much of the credit for the increase was given to the cotton cooperatives. These organizations had led in a movement toward more economical production a better product and more profitable prices They had put new "fight" into the cotton growers, who, like all American farmers back in 1933, were battling an economic war.

In Atlanta, Ga., burglars broke into the residence of Howard Lawson and stole virtually everything he needed in the course of his duties as a member of the police force.

* * *

Twenty-five years ago this week, Lancaster County Fire Marshall Paul Z. Knier, of Manheim, told members of the County Firemen's Assn. meeting in Akron, that thorough investigation of 20 fires in the county during January, 1933, failed to determine the origin of many of them He warned against incendiarism.

* * *

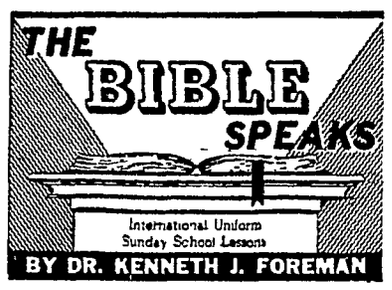
Fritzlyn Gifted Boy owned by William F. Fretz, Pipersville, Bucks County, was named Senior and Grand Champion Guernsey bull of the 1933 Farm Show at Harrisburg

Out in St Louis, Mrs. Gladys Moore testified in her divorce suit that her husband smashed all her china and every window and also broke her nose.

Two new books had been added to library shelves which were extremely popular with teenage boy and girl readers, back in 1933. They were "Calico Bush" by Rachel Field and "Ghosts of the Scarlet Fleet" by Rear Admiral E R Evans

The former was the story of a little French girl in the early days who spent her life on the coast of Maine when the Indians lurked behind trees.

The latter, a story of blood and treachery, involved great fleets of pirate ships on the Spanish Main, secret underground passages and buried treasures.



Bible Material: Luke 4:14-21, II Corinthians 9 6-8, Galatians 6:1-5; Hebrews 4:14-16; 10 23-25; I Peter 2:9-10
Devotional Reading: II Corinthians 5:11-19

Chosen People

Lesson for February 2, 1958

MOST church members do not realize what a privilege it is to be one The Bible passages for this week are extremely suggestive and will bear careful study As usual, there is room here for comment only on two or three points brought out in one of the most striking sentences ever penned to the church — To the church as well as about the church. for most of the New Testament books were written as letters to churches As the reader thinks over the words, he should keep in mind not "This means me," but "This means the church, in which I am privileged to be a member"

Dr. Foreman

A New Kind of People

Saint Peter, writing to people he had probably never seen, dares to say to them some very high things He could say these things because, while he did not know them separately and personally, he knew the church and what God intended it to be "You," he wrote, "are a chosen race, a royal priesthood, a holy nation" A chosen race The church, so far as it is a true church, is made up of persons whom God has chosen. He has chosen them not like separate little pearls each in its own oyster, but as the gathered pearls on a gleaming necklace Peter uses the word "race" rather than organization or group or society Race suggests blood brotherhood, it suggests a common ancestor, a common life. If each race of mankind has something special about it, so the Christians, as the "chosen race," have something special about them. A church which cannot be told apart from just any club, a church whose members are not appreciably different from people on the outside, is a church in name only. Christians as a family are a new kind of people They have been born anew, they have a quality of life no other people have.

God's Personal Representative

Again Saint Peter says, You are "a royal priesthood" Remember these words were not addressed to any particular person or group in the church, they were written to the whole church The church is itself a priesthood; this is what is meant by the expression "the priesthood of all believers" Now Saint Peter had been and still was very much a Jew. For him, priesthood had meant a great deal The priest, in the centuries before Christ, had long been the accepted mediator between God and men. He represented men before God, he represented God in the presence of men Now if the church, taken all together, is the priesthood of God, then it also is, or is expected to be, God's personal representative in this world

Consider only one meaning of this What convinces us that any person exists, and really is the kind of person he is said to be? Next to the person's coming to see us himself, the most convincing evidence that he is real, and no flying-saucer imp, is some friend or relative of his who can make all our doubts vanish by telling us what he knows So the church, as a priesthood in this skeptical world, ought to be representing God in such a convincing way that people no longer doubt that He exists. One test of a true church, as of a true Christian, is: Does this church make it harder, or easier, to believe in God?

The International People

The church is also a "holy nation" It has not always been clearly understood what Saint Peter meant by this Did he mean that Christians must withdraw from the world to a little holy island or ghetto of their own, there to "let the rest of the world go by?" Did he mean that Christians are a supernation, empowered to dictate to all other nations, owing allegiance to no flag but the Christian flag? Unless Peter was out of line with all the rest of the New Testament, he probably meant no such thing He did mean at least this much first that the Christian church lives by higher laws than the "kingdom of this world" The church is the nation where the Law of Love is the constitution Second, since the binding force in this nation is not race or tradition or geography but holy love, it will not have any earthly boundary but will spread throughout the world. The church is the great and only completely international society.

Swine Producers Defer Barrow Show 'till 1959

Plans for a barrow show in March were deferred until 1959 in action taken by the board of directors of the Lancaster County Swine Producers Asn. Thursday night

The directors felt that such a show at this time would over-tax the capacabilities of the new organization

Bulk of the discussion at the meeting centered around the Feb 22 gilt sale being sponsored by the association Sale committee chairman Earl Fisher said that entries had been received for about 15 gilts and 9 boars with more being expected shortly The association has advertised that 40 gilts and 10 boars will be offered

Fisher said that gilts to be sold should be at the Martin Sale Barn in Blue Ball by 10 a m. the day of the sale The order of sale will be determined by lot

Plans for the annual meeting were discussed The meeting, a dinner, is scheduled for 6 30 p m March 27 at the Blue Ball Fire Hall The dinner tickets will be $2 each

J I Hoffman, secretary of the Coatesville YMCA, was engaged to show films of Canadian Rockies and the Calgery, Alb, Stampede as entertainment for the event

The barrow show is now scheduled for the third week of March next year. Competition provided by the state Livestock Exposition rules out the possibility of a fall show, and the directors feel that not enough experience in running a barrow show is available now to make such an event as interesting as it should be.

Poultry Assn. Okays Merger By 57-5 Vote

(Continued from page 1)

by the state in cooperation with the Poultry and Egg National Board Egg Month and Broiler Week promotions are to get special emphasis this year.

Bull was also quite proud of the fifth program — the random sample turkey test. He said that the test this year will be the largest in the nation with 40 entries being expected.

Bull pointed out as one of the greatest hazards to agriculture in the next few years the continuing drop in farm population and thereby a lowering of the voice of agriculture in the legislative bodies of the state and nation.

He said that farmers and farmer groups are going to have to join hands with the allied industries to make their voice heard, or two other groups—consumers and labor—may become the voice of agriculture

"Which is best, I leave to you," he said.

He said, emphasizing his point "Organization and allied industries are the hope of Pennsylvania agriculture"

Lowered enrollment in freshman classes at the Pennsylvania State University are also causes for concern, according to Bull. He offered the suggestion that community scholarship might be the answer at get more boys and girls in school.

Two directors were re-elected one new director named to three year terms on the association board Re elected are Roy Erb. 118 Kreider Ave, Lancaster; and Lewis Mortensen, East Petersburg; newly elected is Eugene Cassell, Manheim.

Directors of the association will meet Feb 6 at the Center.

USDA Recommends Methoxychlor Dust for Hornfly Control on Cows

The US Department of Agriculture today announced that its Agricultural Research Service is recommending use of methoxychlor—applied as a 'dust' treatment only—for control of hornflies on dairy cattle

The Department does not recommend use of methoxychlor 'sprays' applied to dairy cows for control of hornflies or other insect pests The insecticide is recommended as a spray for application in dairy barns as a residual treatment for the control of stable flies and houseflies

The USDA recommendation concerning methoxychlor dust follows the recent decision by the Food and Drug Administration of the Department of Health, Education, and Welfare that (1) no residue of methoxychlor is permitted in milk but(2) there is no objection to the use of methoxychlor on dairy cows if the insecticide is applied so that no residue occurs in mik

Studies have demonstated that when methoxychlor is properly applied as a dust treatment to only the backs of dairy cows no residue of the insecticide occurs in milk USDA entomologists have found that such a dust treatment provides excellent control of hornflies, one of the most costly pests of dairy cattle

They recommend applying one tablespoonful (about 10 grams) of 50 per cent methoxychlor powder to each animal sprinkling it over the back and rubbing it lightly into the hair This treatment will provide control of hornflies for about three weeks The researchers caution, however, that such methoxychlor dust treatments to the animal will not control lice other biting flies, the house fly or ticks

Fastnacht Time is Nearing; Practice Making Breads, Rolls, Doughnuts

This is the time of year when homemakers have a little spare time to experiment with new recipes, especially with breads and baked goods Today we have a few bread recipes for you, along with rolls, doughnuts and fastnachts.

The straight dough method is the most popular way to make breads at home Homemakers prefer it because of its simplicity and consistently good results. Experts recommend the method because of the better flavor, texture and keeping qualities of the bread.

Only one mixing period is used to make the completed dough. All of the ingredients are combined and the dough is kneaded and set aside to rise.

Variations of this method include sweet and rich doughs, refrigerator doughs and so-called "quick-action" doughs. "Quick-action" doughs usually contain added amounts of yeast.

ENRICHED BREAD

1 package yeast, compressed or dry
¼ cup water (lukewarm for compressed yeast warm for dry)
2 cups milk
2 tablespoons sugar
2 teaspoons salt
1 tablespoon shortening
6 cups sifted enriched flour

Soften yeast in water. Scald milk. Add sugar, salt and shortening. Cool to lukewarm. Add two cups flour, stirring well. Add softened yeast. Add enough more flour to make a moderately stiff dough. Turn out on lightly floured board, or pastry cloth, and knead until smooth and satiny (5 to 8 minutes. Shape into ball and place in lightly greased bowl. Grease surface of dough lightly. Cover and let rise in warm place 80 to 85° F. until doubled (about 1½ hours). Punch down. Divide dough into two equal portions. Shape each portion into smooth ball. Let rest 10 minutes. Shape into loaves. Place in greased bread pans, 4½ x 8½ inches. Let rise until doubled (about one hour). Bake in moderately hot oven (400°) 40 to 45 minutes. Makes two one-pound loaves.

BASIC SWEET DOUGH

2 packages yeast, compressed or dry
¼ cup water (lukewarm for compressed yeast, warm for dry)
1 cup milk
½ cup sugar
2 teaspoons salt
¼ cup shortening
5 cups sifted enrich flour (about)
2 eggs
1 teaspoon grated lemon rind (if desired)

Soften yeast in water. Scald milk. Add sugar salt and shortening. Cool to lukewarm. Add flour to make a thick batter. Mix well. Add softened yeast, eggs and lemon rind Beat well. Add enough more flour to make a soft dough Turn out on lightly floured board and knead until smooth and satiny. Place in greased bowl Cover and let rise in warm place until doubled (about 1½ hours). When light, punch down. Let rest 10 minutes Shape into rolls or coffee cake Let rise until doubled (about 45 minutes) Bake in moderate oven (350°) 20 to 30 minutes Makes two or three coffee cakes or about 3½ dozen rolls.

Hot Cross Buns are popular at Easter time Here is a recipe for same, using the above Basic Sweet Dough.

HOT CROSS BUNS

To one recipe Basic Sweet Dough add

1 teaspoon cinnamon
¼ teaspoon allspice
1 cup currants

After adding softened yeast and eggs, add spices and enough more flour to make a soft dough. Stir in currants Turn out on lightly floured board or pastry cloth and knead until smooth and satiny. Place in greased bowl. Coer and let rise in warm place until doubled (about 1½ hours). When light punch down. Let rest 10 minutes. Divide dough into pieces about 1½ inches in diameter. Shape each piece into ball. Place a half inch apart in greased pans or 1½ inches apart on greased baking sheets. Let rise until doubled (about 45 minutes). Bake in moderate oven (350°) 20 to 25 minutes. Make cross of White Icing on each roll.

WHITE ICING

1 egg white
1½ cups confectioners' sugar
¼ teaspoon vanilla extract

To unbeaten egg white add sugar gradually, beating it in. Add vanilla extract. Drop from tip of spoon to form crosses on rolls. Makes about 3½ dozen rolls.

PINEAPPLE CRISS-CROSS COFFEE CAKE

1 cup drained crushed pineapple
¼ cup brown sugar
⅓ cup toasted, shredded coconut
⅛ teaspoon cinnamon
⅓ recipe Basic Sweet Dough
Melted butter or margarine
Confectioners' sugar icing
¼ cup slivered, blanched almonds

Combine pineapple, brown sugar coconut and cinnamon and mix well Roll dough to rectangle about 8 by 12 inches. Place on greased baking sheet. Spread pineapple mixture lengthwise down center third of dough. With scissors or sharp knife, cut slashes two inches long and one inch apart along each long side of dough Fold these pieces across filling alternating from side to side Let rise until doubled (about 45 minutes). Bake in moderate oven (350°) 25 to 30 minutes. When cool, frost with confectioners sugar icing and sprinkle with almonds. Makes one coffee cake.

The batter method is the newest, fastest, easiest way to make yeast breads. This method uses all of the basic principles of bread making, but eliminates the steps of kneading and shaping Mixing is easier and faster because the breads are made from batters rather than doughs.

Bread and rolls made from batters usually have a more uneven shape and somewhat "pebble" surface. The texture is not quite as fine and uniform as a kneaded dough. Because recipes for yeast batters are usually richer than for the other methods, the batter is especially suitable for sweet rolls and coffee cakes.

BASIC BEATEN BATTER

1 package yeast, compressed or dry
¼ cup water (lukewarm for compressed yeast, warm for dry)
1 cup milk
¼ cup sugar
1 teaspoon salt
½ cup shortening
3¼ cups sifted enriched flour (about)
1 egg (for richer batter use two eggs)
½ teaspoon vanilla extract (if desired)

Soften yeast in water. Scald milk. Add sugar, salt and shortening Cool to lukewarm. Add

two cups flour and beat well. Add softened yeast, egg and vanilla extract. Beat well. Add more flour to make a stiff batter. Beat thoroughly until smooth. Cover and let rise until bubbly (about one hour). Use with different toppings to make coffee cakes and puff rolls. Let rise until doubled (about 30 minutes). Bake in moderate oven (375°) 20 to 30 minutes. Makes two eight-inch square or nine-inch round coffee cakes or about two dozen three-inch puffs.

CARMEL PECAN PUFFS

½ recipe Basic Beaten Batter
2 tablespoons melted butter or margarine
½ cup pecan halves
½ cup brown sugar

Prepare muffin pans by putting one-half teaspoon melted butter or margarine in each. Cover with about two teaspoons brown sugar. Sprinkle with few drops water. Arrange three or four pecan halves in each pan. When basic beaten batter is light, stir down. Drop by spoonfuls into prepared muffin pans. Let rise until doubled. Bake in moderate oven (375°) 20 to 25 minutes. Makes about one dozen three-inch puffs.

CRUMBLE SQUARES

½ recipe Basic Beaten Batter
¼ cup enriched flour
¼ cup enriched bread crumbs
2 tablespoons sugar
½ teaspoon cinnamon
2 tablespoons butter or margarine

Combine flour, bread crumbs sugar and cinnamon. Cut or rub in butter or margarine until mixture is crumbly. When basic batter is light, stir down. Spread evenly in greased eight-inch square pan. Sprinkle with crumb mixture. Make squares by pressing lines into batter with floured fingertips. Let rise until doubled. Bake in moderate oven (375°) about 30 minutes. Makes nine 2½-inch squares or 16 two-inch squares

To make Hot Cross Squares add one-half teaspoon cinnamon and one-fourth teaspoon allspice with flour to basic beaten batter When batter is light, add one cup currants and stir down. Follow procedure for Crumble Squares Make cross on each square with confectioners' sugar icing.

SOUR MILK DOUGHNUTS

4½ cups sifted flour
1½ teaspoons soda
1½ teaspoons cream of tartar
1½ teaspoons salt
¼ teaspoon nutmeg
3 eggs
1 cup sugar
3 tablespoons shortening melted
1 cup buttermilk or sour milk

Sift together flour, soda, cream of tartar, salt and nutmeg. Beat eggs until thick and lemon colored. Add sugar, gradually beating it in. Add shortening and buttermilk or sour milk Add flour mixture. Mix well. Roll out ¼ inch thick on lightly floured board or pastry cloth. Cut with floured doughnut cutter. Fry in deep hot fat (375°) for three minutes, or until brown, first on one side, then on other Makes about three dozen three-inch doughnuts.

When you fry doughnuts, just be sure that the fat remains right at 375° from start to finish The doughnuts require only a brief three minutes on each side As soon as you remove them from the fat, place them on absorbent paper to drain.

FASTNACHTS OR RAISED DOUGHNUTS

1¼ cups milk
¼ cup shortening
1 teaspoon salt
1 small yeast cake
3 eggs, beaten
¾ cup sugar
¼ teaspoon nutmeg
4½ to five cups sifted flour

Scald the milk, add shortening and salt. Cool milk until it is lukewarm; then add crumbled yeast cake and stir. Gradually add two and two-thirds cups sifted flour, beating batter thoroughly. Put in a warm place and allow to stand until full of bubbles. Mix sugar with nutmeg and combine with beaten eggs. Stir into first mixture and add remaining flour. Knead well, cover and let rise in a warm place for about one hour. Turn out on lightly floured board and roll ¾ inch thick. Cut with doughnut cutter or biscuit cutter shaping into a ball, or make into twists. Cover with a thin cloth and let rise on board until top springy to touch of finger. Drop into hot fat (365°) with the raised side down, so the top side will rise while under side cooks. Drain on absorbent paper. Yield three dozen.

Exchange Votes 76-7 Favoring Poultry Merger

Members of the Lancaster Exchange Thursday voted 76 to 7 in favor of merging with the Poultry Association to form a single poultry interest group in the county.

The Exchange, which operated the weekly auction sales, also selected three new directors for the coming year They are Roy Herr, Daniel K. Good, and John Longenecker

Mrs. Clara Kopf reported that in the past year the Exchange has done more than $5 million worth of business at the weekly auctions.

COUNTY EGG PRODUCERS were given an opportunity to see egg grading and classification first hand in a demonstration at the Poultry Center Tuesday. John E. Copenhaver, Elizabethtown, left, assisted Bureau of Markets head E. J. Lawless in setting up the display. Watching a demonstration of "black light" use is Ray Heistand, Marietta, right. The ultra-violet light causes bacteria colonies entering the egg to glow. (LF Photo)

CALL
LONG DISTANCE
STATION-TO-STATION

Long distance telephone service is economical however you use it. But when you call station-to-station, then it's downright cheap. Actually, it lets you make three calls for the price of two. And there's no sacrifice in service, either. Only a sizeable saving.

Just tell the operator you'll talk to anyone who answers the long distance number you're calling . . . and you will save more than 30%.

Long distance is even less expensive when you call after 6 p.m. or on Sundays. Then low rates are even lower.

DEPUTY SECRETARY OF Agriculture Lee H. Bull, center, is shown here chatting with Roy Erb, left, and Lewis L. Mortensen, directors of the Poultry Association. Erb and Mortensen were re-elected for an additional three year term on the board Tuesday. Also elected was Eugene Cassell, Manheim. (LF Photo)

Society 12 Sews 445 Cancer Dressings Jan. 22

Twenty-eight members and four visitors attended a meeting of Farm Women 12.

The president, Mrs Sigman, gave a report of the Farm Women Convention.

There was $10 given to Child Development Center.

Annie Brenner was hostess and June Brenner co-hostess.

The next meeting will be held at Marion Glicks at Creswell.

There were 445 cancer dressings made Jan 22 at the home of Elsie Shenk On Feb 20 they will sew at Mrs Shenks for Needy Guild.

An interesting talk on "Magic on Color" was given by Miss Joyce Jacobs of Bell Telephone Co.

"YOUR PROFITS START RIGHT HERE"

Jay Greider shows off a box of bouncing Super-cross babies

These little youngsters have high production bred right into them. They are scientifically produced under strict sanitary conditions with the most modern equipment available.

We are hatching out some of the most beautiful chicks we have ever produced, and liveability so far in 1958 has been almost 100%.

If you have never been able to get real high production, try a flock of Greider Super-cross leghorns, grow them healthy, and we really believe you'll be amazed at the results you will get.

A number of our customers have reported that their flocks actually hit peaks of 100% production in 1957.

Random Turkey Test Application Blanks Available

With an eye to having the largest random sample turkey test in the nation, Pennsylvania's Department of Agriculture Wednesday announced applications to enter birds for the meat production test are available to commercial turkey hatcheryman and breeders

"We are doubling our capacity for turkeys on the test farm in Biglerville," Secretary William L. Henning remarked "It is our hope to make this program the biggest and the best in the nation."

A total of 40 entries will be accepted this year in the test which is to measure economic factors of turkeys that are sold by breeders or hatcheryman on a commercial scale. Last year's Pennsylvania test included 29 entries from nine states. However, 15 entries were turned down because of space limitations.

Henning said applications for the 1958 turkey production test will close March 1. Eggs for the test will be collected between May 1 and 6. Sufficient numbers will be required to produce 120 good poults, he added.

Beginning May 7 eggs will be trayed and placed in incubators. On June 2 eggs will be transferred to a hatchery. Poults will be delivered to the Roy Heckenluber Farm R1, Biglerville on June 6 for brooding and rearing. They will be separated into pens by entries on July 31.

According to Henning weight and feed conversion of pens and individual birds will be recorded after eight, 12, 20 22 and 24 weeks Hens will be dressed on Nov. 21 and toms, which will be weighed again after 26 weeks, will be dressed Dec. 5.

Turkey growers interested in entering the production test should write for an application to the Bureau of Markets, State Department of Agriculture, Harrisburg. There is a $50 entry fee for Pennsylvania entries and a $75 charge for out-of-state growers.

Farm Women 9 Hear Reports From Convention

Farm Women No. 9 met at the home of Mrs Helen Zercher of Marticville. Mrs. Pearl Kleinhaus was co-hostess.

Devotions were in charge of Mrs. Helen Zercher. A report was given of the State Convention at Harrisburg.

Plans were made to sew cancer bandages Monday evening, Jan. 27 at the home of Mrs. Minnie Warfel, Conestoga.

Slides were shown by Robert Zercher of a recent trip to New York and Niagra Falls. Refreshments were served by the host and hostess.

KEEP YOUR COWS PRODUCING AT HIGHER, MORE PROFITABLE LEVELS ALL WINTER!

HERE'S HOW:

1. Feed good quality forage.
2. Supplement diets with Red Rose Dairy Feeds or Red Rose Dairy Supplements — they are concentrated sources of all the essential nutrients lacking in home-grown grains and forage.
3. Provide plenty of fresh water.
4. Provide plenty of bedding for warmth and comfort.
5. Keep cows dry, out of drafts.
6. Plan for winter breeding and fall freshening to boost production when prices are highest.

For more milk profits this winter – and all year 'round – feed

USDA Sustains Philadelphia Milk Marketing Order After Hearing

The U.S Department of Agriculture announced Jan 16 that as a result of a meeting held Jan 15 to consider suspension of certain provisions of the Philadelphia Milk Marketing Order, no suspension action will be taken.

At the same time Secretary of Agriculture Ezra Taft Benson said he has asked Assistant Secretary Don Paarlberg to meet with officials of the Pennsylvania Milk Control Commission to discuss possibilities of more properly correlating the operations of the Federal and State Milk Orders in the Philadelphia market.

"The problems associated with regulating producer prices in the Philadelphia milk market are very complex, involving both Federal and State responsibilities and agencies," Secretary Benson said. "In view of the importance of the problems and issues involved, we feel it incumbent that the U.S. Department of Agriculture and the Milk Control Commission of Pennsylvania give further and thorough consideration to procedures which will permit the practical and harmonious operation of both the Federal and State mik marketing orders in Philadelphia."

The Department also announced today that amendments to the Philadelphia milk marketing order, which were recently approved by producers voting in a referendum, would be issued to be effective Feb 1, 1958.

Federal Order Retention Lauded By Henning

State Secretary of Agriculture William L Henning Friday said retention of Federal Milk Order 61 will be advantageous to Pennsylvania dairyman shipping to the Philadelphia market

Henning, in a statement issued following announcement that the federal order would be continued with producer approved amendments effective Feb. 1, said Pennsylvania farmers will benefit in the "long run" because the federal order regulates the inter-state movement of mik and requires dealers to pay dairymen a minimum price. The State's Milk Control Commission cannot regulate inter-state milk shipments.

"It is imperative that a federal order continue in the Philadelphia milk marketing area," Henning declared. "We know that the farmer and the milk dealer must be protected from disorganized milk marketing practices."

Earlier this month the Philadelphia order was kept in force following special meetings by industry representatives for suspension of certain provisions of the regulation. At the same time officials said efforts would be made to correlate the Federal and State marketing orders.

Feed Executive Predicts 1958 As 'Good Year'

A favorable year for both farmer and feedmen was predicted Thursday by Robert D Emmons, vice president of the Wirthmore Feed Co, at a meeting held in Lncaster.

He also predicted that dealers in the Lancaster area can be expected to increase their business during the coming year by using new sevice facilities to their greatest potential Emmons noted that dealers in this area had shown a very favorable increase in business during the past 12 months.

Lew Whitaker, Wirthmore sales manager, discussed new products related to the feed business now being introduced and marketed.

Local dealers and dealer salesmen attending were. Paul Hiestand, Chris Hiestand, Ben Graybill, Amos Mummau, Glenn H. Herr, Mahlon Kreider, Le Roy Sensenig, Norman Kurtz, Marvin Weaver

Clem E Hoober, Jacob Hoober, Morris Hershey, Paul M Ressler, Gordon Reshler, George Spotts, Lamber Smith, George Holton, Oran Dillabaugh, Jacob Bleacher and Jonas Frey

Representing Wirthmore were Emmons, Whitaker, Roger Ham, Charles Perkins, John Renshaw, Bob Eckberg, Travis C Johnson and Bill Mateer

Trench Silos Cost Less to Operate

It costs $5 18 to harvest, store and feed a ton of silage when an upright silo is used, compared with $3 93 with a trench silo, according to a cooperative study by the USDA and the Alabama Experiment Station on 71 Alabama farms

Spoilage was 2 3 per cent greater, however, with the trench silo.

A BIG GUERNSEY SALE—A Dispersal and a Reduction Sale of Two Good Herds February 6—12 30 Noon—At the Association's Sales Pavilion, 6 miles east of Lancaster, Pa, on Route 30. 75 Head—10 Open Heifers—Balance Cows. Pennsylvania's Animal Disease Control Programs Reviewed

READING—Pennsylvania's animal disease eradication programs were placed on review for farmers Tuesday by Dr. Howard A. Milo, director of the Bureau of Animal Industry in the State Department of Agriculture

Doctor Milo and C M Stevens, head of the State's brucellosis division, reported on individual programs and their progress, touching such subjects as tuberculosis, leptospirosis and mastitis.

At a meeting of southeastern representatives to the Pennsylvania Dairy and Livestock Health Committee Dr. Milo said a voluntary program to determine the incidence of swine brucellosis and leptospirosis in the State now is underway Results will determine whether a need exists for a statewide eradication program.

According to Dr. Milo, only native Pennsylvania market swine will be blood tested in the leptospirosis and brucellosis program. Of the 48 slaughter houses under full-time State meat inspection he said only 16 receive native Pennsylvania swine Blood samples taken from Pennsylvania hogs will be anaylzed at the Bureau's Summerdale laboratory.

The meeting, held at the Wernersville State Hospital and attended by representatives of livestock health committees in 10 counties, was the first in a series to continue through February, covering all areas of the State. Other meetings are scheduled at Montoursville, Jan. 29, and Dallas, Jan. 30. A statewide meeting is set for March 20 and 21 in Harrisburg.

In addition to Doctors Milo and Stevens, other participants at the regional meeting included Dr. Sam Guss, extension veterinarian at the Pennsylvania State University and Joe S. Taylor who is in charge of dairy science extension at Penn State.

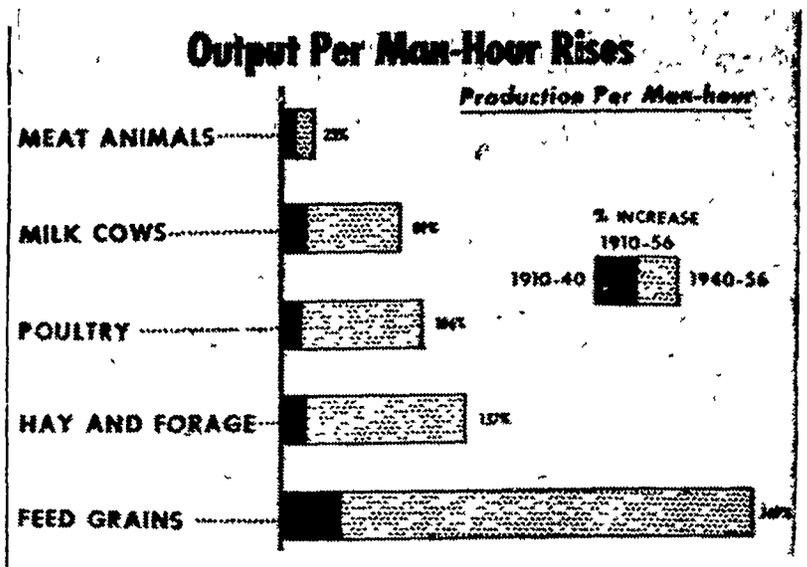
Keystone State Egg Production Takes Third Drop

Pennsylvania egg production for the third consecutive year dipped below the preceding year's figure, the State Department of Agriculture said today

Surveys by the Pennsylvania Crop Reporting Service show 3,51 million eggs were produced in 1957, nearly two per cent below the 3,629 million output for 1956. The record year was 1954 when 3,654 million eggs were produced in Pennsylvania.

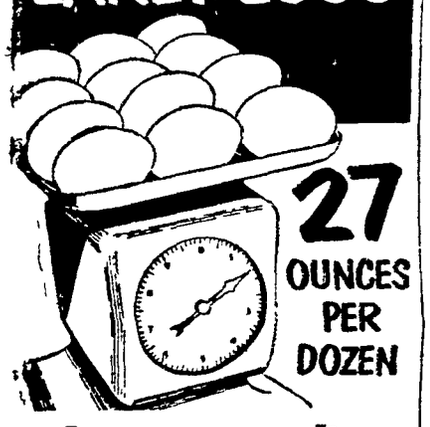
December 1957 production figures played a major role in the output decrease, the Department said. Layers in flocks produced 305 million eggs, 21 million fewer than for the same month in 1956.

Poultry feeds in December 1957 averaged 10 to 20 cents a hundredweight below the prices for the same month in 1956.



MECHANIZATION HAS GREATLY increased the output per man-hour invested in agricultural production However, the United States Department of Agriculture chart above illustartes that some areas of agricultural production are better suited to take advantage of such progress than are others. For example, meat animal production per man-hour increased only 25 per cent since 1910 while feed grain production has jumped an amazing 349 per cent.

This year get LARGE SIZE EARLY EGGS



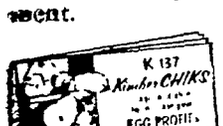
An outstanding characteristic of K-137 KimberCHIKS

As of January 1, 1956, K-137 Kimberchiks led in early egg size in all three official random sample tests in which they were entered—California, Missouri, and Utah. Since large eggs are often worth 100% more than small, and 35-50% more than medium, this characteristic of the K-137 can make a great difference in income during the pullet year.

The K-137 is also noted for its good egg quality, both shell and interior. The high percentage of firm albumen results in more AA quality eggs.

The K-137 has good livability... 93.4% to about 18 months in the three official tests in which they were entered last year.

We invite you to compare the performance of this outstanding stock under your own management.



16 Page Booklet FREE

Please ask for this booklet describing the broad breeding program conducted by Kimber Farms, Inc. and giving more information about the K 137.

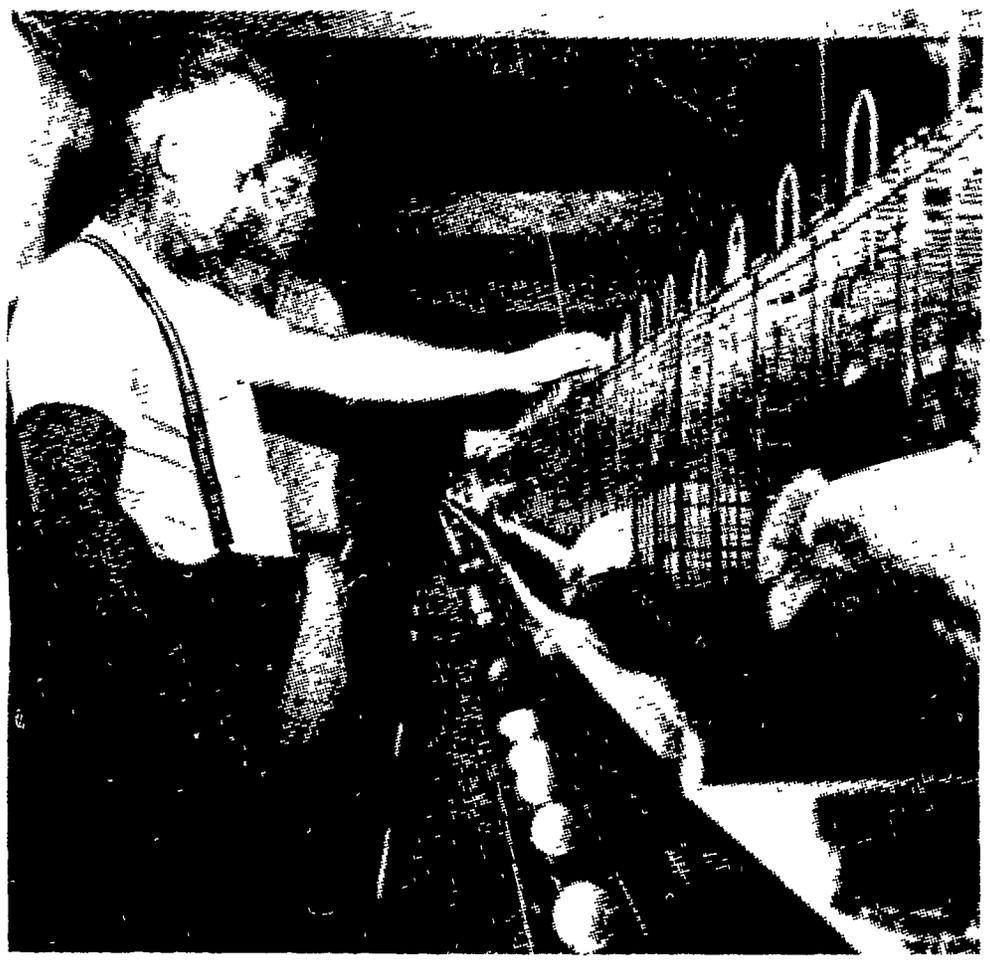
Business poultrymen are buying PURINA feed efficiency for low-cost production



17.2 cents feed cost per dozen

John Rutt, who farms near Ephrata in Eastern Pennsylvania, last year decided to make a careful check of egg production cost. He and Jim Rupp, serviceman from his dealer in Ephrata, kept track of every egg laid and every pound of Purina Layena fed for 7 straight months. At the end of 7 months' record here is his conclusion:

"I have always considered Purina a good buy because of its quality and efficiency. Now I know it What's more, I get the free help of a trained serviceman whenever I need it. And Jim's right here close to home."

HERE IS THE RECORD THAT CONVINCED HIM:

Month	Number of Hens	Number of Eggs	Lbs. Feed Cage Layena	% Prod.	Lbs. Feed per Dozen	Feed Cost Per Doz.
January	1,000	21,871	7,400	71	4 05	17 79¢
February	1,000	21,317	7,000	76	3 94	17 86¢
March	999	23,944	7,700	77	3 84	17 37¢
April	949	22,178	7,100	78	3 30	17 28¢
May	1,000	22,662	7,400	73	3 87	16 96¢
June	1,000	21,707	7,000	72	3 81	16 83¢
July	977	21,102	6,400	70	3 63	16 33¢

YOU CAN DEPEND ON PURINA EFFICIENCY FOR LOW-COST PRODUCTION

ANTIBIOTICS

Their Values and Limitations

You hear a lot about antibiotics and extra production feeds these days. Our own research and a review of most college reports indicate that antibiotic treatments for laying hens often are worth the money when the birds are diseased . . usually are not when hens are healthy and laying well When you do need antibiotics, Purina will furnish them on special order in your regular Purina Chow. Or your have your choice of several Purina products. Your Purina Serviceman will help you choose the best one for your conditions

Chek-R-Aid—Treatment feed with Aureomycin (100 gms. per ton) and extra-high levels of vitamins to help restore health and appetite.

Check-R-Mycin — High-level antibiotic treatment for use in drinking water.

Pura-Mycin — new drinking water treatment containing a high level of another antibiotic—Terramycin.

Boost-R-Aid — a "convalescent" drinking water treatment to give to birds recovering from disease or going through the stress of vaccination, moving, etc. Has a lower level of antibiotic, plus high-level vitamins

Inject-R-Mycin — High-level antibiotics for injection when other methods fail Often brings quick and dramatic relief.

Don't wait until it's too late. Call your Checkerboard Serviceman at first signs of trouble.
